ESTIMATED HISPANIC DROPOUT RATES

	Hispanic Dropouts (9-12)	Hispanic Dropouts (9- 12)**	Calculated Hispanic Enrollment*
1993-94	12.74%	761	5,975
1994-95	13.05%	859	6,580
1995-96	10.65%	759	7,126
1996-97	9.61%	828	8,617
1997-98	9.83%	770	7,837
1998-99	8.49%	701	8,259
1999-00	8.44%	671	7,946
2000-01	8.19%	637	7,777
2001-02	6.37%	536	8,408
2002-03	7.19%	528	7,341
2003-04	6.83%	503	7,368

* - At this time, the SDE is unable to determine the exact hispanic enrollment by grade. The enrollment figures shown here are calculated from the enrollment data collected in September. The data is provided by teachers showing the ethnicity of students in first period. Since these figures are below the actual K through 12 enrollment, the data must be extrapolated to represent the hispanic enrollment. The estimated hispanic enrollment by grade is found by calculating the overall percentage of hispanic students reported for each school district. This percentage is applied to the total school year enrollment by grade for the district to estimate the total hispanic enrollment by grade. The district totals are added to arrive at the Statewide totals.

** - These are the actual number of dropouts by grade reported to the SDE by the districts.

Dropout rate of a hypothetical 9th grade class through graduation

COHORT RATE

	Calculated Hispanic Dropouts	Estimated Dropout Rate:
1993-94	726	41.91%
1994-95	791	42.61%
1995-96	742	35.91%
1996-97	808	33.09%
1997-98	755	33.73%
1998-99	682	29.54%
1999-00	621	29.56%
2000-01	589	28.86%
2001-02	517	23.19%
2002-03	576	26.31%
2003-04	551	25.14%

*** - This rate is determined by creating a hypothetical 9th grade class and following the class through to graduation. The estimated 9th grade Hispanic enrollment is multiplied by the 9th grade Event Dropout Rate to get the number of dropouts for that school year. These dropouts are then subtracted from the 9th grade class, giving us the estimated 10th grade class enrollment. This process is repeated until graduation. The Estimated Dropout Rate is then calculated by dividing the total number of dropouts over 4 years by the original 9th grade Hispanic enrollment, showing the percentage of students who dropped out from that original 9th grade class.

* - At this time, the SDE is unable to determine the exact hispanic enrollment by grade. The enrollment figures shown here are calculated from the enrollment data collected in the fall. The data is provided by teachers showing the ethnicity of students in first period as of the last Friday in September. Since these figures are less than the actual enrollment, the data must be extrapolated to represent Hispanic enrollment. The estimated hispanic enrollment by grade is found by calculating the overall percentage of hispanic students reported for each school district. This percentage is applied to the total school year enrollment by grade for the district to estimate the total hispanic enrollment by grade. District totals are added to arrive at Statewide totals.

** - These are the actual number of dropouts by grade reported to the SDE by the districts.
